- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.

- Do not expose your TV to dripping or splashing.
with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

- **Unplug this apparatus during lightning storms or when unused for long periods of time.**
- **Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as when the power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally or has been dropped.**
- **Unplug the power cord before cleaning your TV.**
- **When moving your TV from an area of low temperature to an area of high temperature, condensation may form in the housing. Wait before turning on your TV to avoid causing fire, electric shock, or component damage.**
- **A distance of at least three feet should be maintained between your TV and any heat source, such as a radiator, heater, oven, amplifier etc. Do not install your TV close to smoke. Operating your TV close to smoke or moisture may cause fire or electric shock.**
- **Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of your TV and to protect it from overheating, be sure these openings are not blocked or covered. Do not place your TV in a bookcase or cabinet unless proper ventilation is provided.**

Do not defeat the safety purpose of the grounded plug.**
- **When connected to a power outlet, power is always flowing into your TV. To totally disconnect power, unplug the power cord.**
- **The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of un-isolated, dangerous voltage within the inside of your TV that may be of sufficient magnitude to constitute a risk of electric shock to persons.**
- **Do not overload power strips and extension cords. Overloading can result in fire or electric shock.**
- **The wall socket should be installed near your TV and easily accessible.**
- **Only power of the marked voltage can be used for your TV. Any other voltage than the specified voltage may cause fire or electric shock.**
- **Do not touch the power cord during lightning. To avoid electric shock, avoid handling the power cord during electrical storms.**
- **Unplug your TV during a lightning storm or when it will not be used for long period of time. This will protect your TV from damage due to power surges.**
- **Do not attempt to repair or service your TV yourself.**
Opening or removing the back cover may expose you to high voltages, electric shock, and other hazards. If repair is required, contact your dealer and refer all servicing to qualified service personnel.

The nationwide switch to digital television broadcasting was complete on June 12, 2009. Analog-only television sets that receive TV programming through an antenna now need a converter box to continue to receive over-the-air TV. Watch your local stations to find out when they will turn off their analog signal and switch to digital-only broadcasting. Analog-only TVs should continue to work as before to receive low power, Class A or translator television stations and with cable and satellite TV services, gaming consoles, VCRs, DVD players, and similar products.

**IMPORTANT SAFETY INFORMATION FOR VIEWING 3D CONTENT**

You may experience discomfort while watching 3D content. You may feel symptoms of eye strain, vision fatigue, color or depth distortion, motion sickness, nausea, dizziness, disorientation, or other discomforts. If you experience any of these symptoms, stop watching and take a break for at least thirty minutes before resuming. If the symptoms are severe or continue even after you have stopped watching 3D content, consult a doctor.

Take care to monitor children’s watching of 3D content. Children (including teenagers) may be more at risk of experiencing discomfort while watching 3D content and less likely to report symptoms. Monitor children’s 3D content viewing and watch for signs of discomfort.

Some viewers may be susceptible to epileptic seizures or strokes when viewing 3D images, even if those conditions have not been previously diagnosed. If you or anyone in your family has a history of seizures or strokes, or if you have any other reason to think you or someone under your supervision may be susceptible to epileptic seizures or strokes, consult a doctor before watching 3D content.

Even if you do not experience any of the above symptoms, take regular breaks from watching 3D content.
TELEVISION ANTENNA CONNECTION PROTECTION

If an outside antenna/satellite dish or cable system is to be connected to the TV, make sure that the antenna or cable system is electrically grounded to provide some protection against voltage surges and static charges.

Article 810 of the National Electrical Code, ANSI/NFPSA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of the grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements of the grounding electrode.

Lightning Protection

For added protection of the TV during a lightning storm or when it is left unattended or unused for long periods of time, unplug the TV from the wall outlet and disconnect the antenna or cable system.

Power Lines

Do not locate the antenna near overhead light or power circuits, or where it could fall into such power lines or circuits. Remember, the screen of the coaxial cable is intended to be connected to earth in the building installation.

Installing the TV

INSPECTING THE PACKAGE CONTENTS

Before installing your new TV, take a moment to inspect the package contents. Use the images below to ensure nothing is missing or damaged.

VIZIO LCD HDTV

Quick Start Guide

Power Cord

Remote Control with Batteries

3D Glasses (2)

INSTALLING THE TV

After removing the TV from the box and inspecting the package contents you can begin installing the TV. Your TV can be installed in two ways:

- On a flat surface, using the included stand
- On a wall, using a VESA-standard wall mount (not included)

Installing the TV Stand

Your TV includes a stand designed to support the weight of the TV and keep it from falling over. However, the TV can still fall over if:

- It is placed on an uneven, unstable, or non-level surface
- It is pushed, pulled, or otherwise improperly moved
- If an earthquake occurs and the TV is not properly secured
To install the TV stand:
1. Place the TV screen-down on a clean, flat surface. To prevent scratches or damage to the screen, place the TV on a soft surface, such as carpet, rug, or blanket.
2. Push the base onto the neck as shown.
3. Insert and tighten the thumbscrew.
4. Move the TV with attached stand into an upright position and place on a flat, level, and stable surface.
5. To ensure proper ventilation, leave at least 1" of space between the back of the TV and any other objects (walls, etc).

Installing the TV on a Wall
To mount your TV on a wall, you will need a wall mount. Consult the information below to find the appropriate mount for your TV model:

- Installing a TV on a wall requires lifting. To prevent injury or damage to the TV, ask someone to help you.

To install your TV on a wall:
1. Disconnect any cables connected to your TV.
2. Place the TV face-down on a clean, flat, stable surface. Be sure the surface is clear of debris that can scratch or damage the TV.
3. Remove the base by loosening and removing the screws.
4. Attach your TV and wall mount to the wall, carefully following the instructions that came with your mount.

Use only with a UL-listed wall mount bracket rated for the weight/load of this TV. See Appendix A - Specifications for the weight of this TV.

HOW THEATER 3D WORKS

Because our eyes have space between them, when we look around, we see two slightly different pictures. We never notice, because we are able to combine these pictures into one three-dimensional image.

The VIZIO Theater 3D HDTV takes advantage of this phenomenon to create a stunning 3D image. When displaying 3D content, the 3D HDTV actually displays two separate images at the same time—one for each eye.

Because Theater 3D glasses only allow each eye to see its intended image, your brain is able to process the picture in the same way as any other object you see. The final result is a stunning, life-like 3D picture.

WHAT YOU NEED TO VIEW 3D CONTENT

To view 3D content, you will need:

- VIZIO Theater 3D HDTV
- 3D Blu-ray™ player with a Blu-ray 3D™ disc (sold separately)
- VIZIO Theater 3D Glasses
- 3D-Ready HDMI cable (sold separately)

WATCHING BLU-RAY 3D CONTENT

To view Blu-ray 3D content:

1. Ensure you have the following equipment:
   - VIZIO Theater 3D HDTV
   - 3D Blu-ray™ player with a Blu-ray 3D™ disc (sold separately)
   - VIZIO Theater 3D Glasses
   - 3D-Ready HDMI cable (sold separately)

2. Ensure the 3D Blu-ray player and your TV are connected with the 3D-Ready HDMI cable.

3. Turn the 3D Blu-ray player off. Press the Power/Standby button on the remote to turn the TV on.

4. Press the INPUT button on the remote and select the input to which the Blu-ray player is connected (HDMI-1, HDMI-2, etc).

5. Turn the 3D Blu-ray player on. Insert the Blu-ray 3D disc into the player.

6. When the disc is loaded, select the Play Movie option in the disc’s main menu.

7. The TV displays, “3D Content detected. Select YES to switch to 3D, NO to display in 2D.” Highlight Yes and press OK.

8. Put on your Theater 3D glasses and enjoy the movie!
GETTING THE BEST 3D PICTURE

For the best 3D viewing experience, VIZIO recommends that you install the TV with the viewing distance and viewing angle in mind. When viewing 3D content, it is important that you view the TV straight-on, or some of the 3D effect may be lost.

For your TV, VIZIO recommends:

Incorrect 3D Viewing Distance and Angle

In the example below, two of the viewers are sitting too close to the TV for a good 3D effect. In addition, the child on the floor is not seeing the best possible picture because he/she is looking up at the TV.

The viewers in the example below are not seeing the best 3D picture.

Correct 3D Viewing Distance and Angle

In the examples below, all of the viewers are experiencing the best possible 3D picture quality.

In this example, the viewers have mounted the TV on a Tilt Mount. They are at the correct distance and they are viewing the TV straight-on, close to the ideal eye line. They will experience good 3D picture quality.
