### QUICKSTART GUIDE

**The Best Connection**

For the best quality picture, we recommend using HDMI, M-Audio, or Component inputs where possible. These are the only input connections capable of high definition (HD) video/audio. These inputs deliver the best picture and sound quality.

- HDMI is capable of all HD signals.
- Component & Optical audio is capable of HD signals.
- AV/S-Video and Audio is capable of HD signals.

- Both HDMI and TV share the same port. The television will automatically switch to the input type it is viewing.

### Four Easy Steps

**Simply follow our color-coded Step Charts and you’re done.**

1. **Choose items to connect to your VIZIO HDTV**
   - Determine which type of Signal Source and any Additional Equipment you wish to connect to your VIZIO HDTV.
   - The colored dots under each Signal Source and Additional Equipment indicate which type of connections you may use to connect to your VIZIO HDTV.
   - Using these inputs does not guarantee high definition (HD).

2. **Choose equipment connection methods**
   - Using the colored dots from Step One, follow the row across to Step Two to match the colored dots to the same colored connection method.
   - Choose **BEST** or **GOOD** method for each piece of equipment.

3. **Select cables and make connections**
   - Once you have determined the connection methods from Step Two, follow the row to Step Three to determine what kind of cables you need and what the connections look like on your equipment.
   - Following the color-coded system, use the appropriate cables and connect your Signal Source and Additional Equipment to the color-coded inputs on your VIZIO HDTV. (Refer to Connection Map at bottom of page!)
   - Once connected, turn on your VIZIO HDTV and all your equipment.

4. **Use your VIZIO HDTV**
   - Follow the programming instructions on the other side of this guide.
   - **If you are using the DTV or TV input**, turn over this guide and follow Procedure 1.
   - **If you are using an input other than DTV or TV**, turn over this guide and follow Procedure 2.

### Contents:

- Power Cord
- Remote Control
- Screen Cloth & HDMI Cable
- VIZIO Quick Start Guide, VIZIO Remote Control, and Registration Card

### Before You Begin

- Verify all of the contents of your accessory package
- Review safety guidelines in Owner’s Manual
- Place your High Definition TV so that the rear connectors are accessible
- Write down your VO42LF 10A Serial Number (located on the back)

### 3 WAYS TO GET HDTV

1. **DVB-T Antenna** (using the DTV antenna input).
   - To use if you are able to receive HD signals over-the-air and for help choosing the right antenna, visit www.antennaweb.org.
   - You may also need a HD antenna receiver.

2. **Cable** - Subscribe to HD programming through your local cable company (HD cable box required).

3. **Satellite** - Subscribe to HD programming through DirecTV or Dish Network (HD satellite receiver required).

### In need of a particular cable to make the connection you want?**

HD cables are available at www.VIZIO.com (view back for more details).

For more information, see your Owner’s Manual, Chapter 2, CONNECTING EQUIPMENT.
Quickstart Guide

For Your Information:

- Coaxial connection (RF connector) is recognized as the threaded connector, commonly called cable, screw on or coaxial connector which carries the image (picture) and sound (audio) through a single cable.
- Composite connection (RCA connectors) is recognized by the three (yellow, red and white) standardized color coded RCA connectors. Yellow carries the image (picture); red (right channel) and white (left channel) carry the sound (audio) of the signal.
- Component connection (RCA connectors) is recognized by the three (green, blue and red) standardized color coded RCA connectors for image (picture) plus the two (red and white) standardized color coded RCA connectors for the sound (audio) of the signal.
- HDMI (High-Definition Multimedia Interface) connection (HDMI connector) is recognized by the standardized elongated D-Shaped connector which carries both the image (picture) and the sound (audio) of the signal through a single cable.
- S-Video (separate video) connection (4-pin Mini-DIN connector) is recognized by the small connectors at the end of a cable with multiple pins in it. This connection carries only the image (picture) of the signal; therefore, there is a need to supply a separate sound (audio) signal by using the two (red and white) standardized color coded RCA connectors.

Displaying Channels from different Signal Sources (External TV Tuner, VCR, Cable Box or Satellite Receiver) through different Inputs.

**STEP 2.1**

- Turn on the TV. The Initial Setup menu screen should appear. If this screen does not appear, press the Menu key to continue to next screen.
- Press the OK key to exit the Initial Setup menu.
- Select Language. English, Spanish, French. Press OK to continue to next screen.
- Press a number to select Cable or Antenna.

**STEP 2.2**

- Turn on the TV. The Initial Setup menu screen should appear. If this screen does not appear, please skip to Step 2.
- Select Language, English, Spanish, French.
- Press OK to exit the Initial Setup menu.
- If you have an HD service you must use the HDMI input or Component connection.

Note: Consult your Cable or Satellite Owner’s Manual to determine if you have HD service. If the selected input is RF connection, you should be aware that the TV set needs to be on either channel 3 or channel 4 matching the channel which has been selected on the back of the VCR, Cable Box or Satellite Receiver, please refer to Owner or Satellite Receiver manual on how you can enhance your VIZIO experience, call 888-849-4623.

Programming your TV to Receive and Display Channels: All you need is your Remote Control.

- Receiving Channels through DTV/TV Input using Regular Antenna or Regular Cable Service (No Box Signals).

**STEP 1.1**

- Connect your signal source (cable from antenna or cable from the wall for Cable Service without box) directly to your TV by using a standard COAXIAL connection.

**STEP 1.2**

- Turn on the TV. The Initial Setup menu screen should appear. If this screen does not appear use your TV’s remote control to begin the process. If the screen does not appear, please skip to Step 2.
- Select Language, English, Spanish, French.
- Press OK to continue to next screen.
- Press a number to select Cable or Antenna.

- Press OK to exit the menu screen.

- If scanning is finished, programming is complete. Press the OK key to exit.

Fine Tuning your TV for Home Use.

After completing either Procedure 1 or Procedure 2, please follow the steps below to optimize your TV’s on-screen display.

1. Press the key to bring up the 10-key display. Use the arrows or button to scroll to the Color Temperature option.
2. Press the button to select it.
3. Either or press to change setting to Normal, and then press the key again to go back to previous screen.
4. Either or press to select the Picture Mode option.
5. Either or press to change the Picture Mode option to Standard.

Turn on the TV. The Initial Setup menu screen should appear. If this screen does not appear, press the key to exit the on-screen display menu.

Note: If you followed Procedure 1, take the following steps to ensure that the correct picture tones are shown when pressing the guide key:

- If you have an HD service, press the green button.
- If you have an SD service, press the blue button.

Press the key, which will bring up the picture mode menu.

Pressing either the or button, scroll across to the icon showing the little satellite dish or antenna. The next screen will appear showing Tone.Zoom, using either the or button, select it, and finally pressing either the or button, choose the proper Tone.Zoom for your area. Press the key to exit the on-screen display menu.

Optional Components

- ENHANCE YOUR VIZIO EXPERIENCE

When it comes to components and accessories, there’s nothing better than VIZIO. We offer a full line of products specifically designed to accentuate your VIZIO HDTV. To learn more about how you can enhance your VIZIO experience, call 888-849-4623 or visit www.VIZIO.com.

VIZIO HIGH-DEFINITION CERTIFIED CABLES

Our VIZIO Certified HD cables carry the same standards of excellence as all our VIZIO products. Available in DVI, HDMI and Component in lengths of 2, 5, and 10 meters

VIZIO CERTIFIED MOUNTS

- FLUSH MOUNT—mount your HDTV into a wall of art.
- TILT MOUNT—adjust your HDTV for the most comfortable viewing position.
- ARTICULATING ARM—position your HDTV exactly where you want it.
