WHEN READING THIS MANUAL

This symbol alerts you to important warnings or notices as part of the operating instructions.

This symbol identifies helpful tips.

IMPORTANT SAFETY INSTRUCTIONS

Your TV is designed and manufactured to operate within defined design limits. Misuse may result in electric shock or fire. To prevent your TV from being damaged, the following instructions should be observed for the installation, use, and maintenance of your TV. Read the following safety instructions before operating your TV. Keep these instructions in a safe place for future reference.

• To reduce the risk of electric shock or component damage, switch off the power before connecting other components to your TV.
• Read these instructions.
• Keep these instructions.
• Heed all warnings.
• Follow all instructions.
• Do not use this apparatus near water.
• Clean only with dry cloth.
• Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
• Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
• Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
• Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
• Only use attachments/accessories specified by the manufacturer.
Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

Unplug this apparatus during lightning storms or when unused for long periods of time.

Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally or has been dropped.

Unplug the power cord before cleaning your TV.

When moving your TV from an area of low temperature to an area of high temperature, condensation may form in the housing. Wait before turning on your TV to avoid causing fire, electric shock, or component damage.

A distance of at least three feet should be maintained between your TV and any heat source, such as a radiator, heater, oven, amplifier etc. Do not install your TV close to smoke. Operating your TV close to smoke or moisture may cause fire or electric shock.

Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of your TV and to protect it from overheating, be sure these openings are not blocked or covered. Do not place your TV in a bookcase or cabinet unless proper ventilation is provided.

Never push any object into the slots and openings on your TV cabinet. Do not place any objects on the top of your TV. Doing so could short circuit parts causing a fire or electric shock. Never spill liquids on your TV.

Your TV should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

Do not apply pressure or throw objects at your TV. This may compromise the integrity of the display. The manufacturer’s warranty does not cover user abuse or improper installations.

The power cord must be replaced when using different voltage than the voltage specified. For more information, contact your dealer.

When connected to a power outlet, power is always flowing into your TV. To totally disconnect power, unplug the power cord.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of un-isolated, dangerous voltage within the inside of your TV that may be of sufficient magnitude to constitute a risk of electric shock to persons.

Do not overload power strips and extension cords. Overloading can result in fire or electric shock.

The wall socket should be installed near your TV and easily accessible.

Only power of the marked voltage can be used for your TV. Any other voltage than the specified voltage may cause fire or electric shock.

Do not touch the power cord during lightning. To avoid electric shock, avoid handling the power cord during electrical storms.

Unplug your TV during a lightning storm or when it will not be used for long period of time. This will protect your TV from damage due to power surges.

Do not attempt to repair or service your TV yourself. Opening or removing the back cover may expose you to high voltages, electric shock, and other hazards. If repair is required, contact your dealer and refer all servicing to qualified service personnel.
• WARNING: Keep your TV away from moisture. Do not expose your TV to rain or moisture. If water penetrates into your TV, unplug the power cord and contact your dealer. Continuous use in this case may result in fire or electric shock.
• Do not use your TV if any abnormality occurs. If any smoke or odor becomes apparent, unplug the power cord and contact your dealer immediately. Do not try to repair your TV yourself.
• Avoid using dropped or damaged appliances. If your TV is dropped and the housing is damaged, the internal components may function abnormally. Unplug the power cord immediately and contact your dealer for repair. Continued use of your TV may cause fire or electric shock.
• Do not install your TV in an area with heavy dust or high humidity. Operating your TV in environments with heavy dust or high humidity may cause fire or electric shock.
• Follow instructions for moving your TV. Ensure that the power cord and any other cables are unplugged before moving your TV.
• When unplugging your TV, hold the AC/DC power adapter, not the cord. Pulling on the power cord may damage the wires inside the cord and cause fire or electric shock. When your TV will not be used for an extended period of time, unplug the power cord.
• To reduce risk of electric shock, do not touch the connector with wet hands.
• Insert batteries in accordance with instructions. Incorrect polarities may cause the batteries to leak which can damage the remote control or injure the operator. Do not expose batteries to excessive heat such as sunshine, fire or the like.
• If any of the following occurs, contact the dealer:
  - The performance of your TV changes substantially.
  - This apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
  - The mains plug or appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
  - CAUTION - These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated DANGEROUS VOLTAGE within the product's enclosure that may be of sufficient magnitude to constitute a risk of electrical shock to persons.
TELEVISION ANTENNA CONNECTION PROTECTION

If an outside antenna/satellite dish or cable system is to be connected to the TV, make sure that the antenna or cable system is electrically grounded to provide some protection against voltage surges and static charges.

Article 810 of the National Electrical Code, ANSI/NFPSA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of the grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements of the grounding electrode.

Lightning Protection
For added protection of the TV during a lightning storm or when it is left unattended or unused for long periods of time, unplug the TV from the wall outlet and disconnect the antenna or cable system.

Power Lines
Do not locate the antenna near overhead light or power circuits, or where it could fall into such power lines or circuits. Remember, the screen of the coaxial cable is intended to be connected to earth in the building installation.

INSPECTING THE PACKAGE CONTENTS

Before installing your new TV, take a moment to inspect the package contents. Use the images below to ensure nothing is missing or damaged.

- VIZIO LED HDTV
- Remote Control with Batteries
- 2 x Quick Start Guides (1 x English, 1 x French/Spanish)
- TV Stands
- Power Cord
- 4 x Phillips Screws
INSTALLING THE TV

After removing the TV from the box and inspecting the package contents, you can begin installing the TV. Your TV can be installed in two ways:

- On a flat surface, using the included stand
- On a wall, using a VESA-standard wall mount (not included)

Installing the TV Stands
Your TV includes stands designed to support the weight of the TV and keep it from falling over. However, the TV can still fall over if:

- It is placed on an uneven, unstable, or non-level surface
- It is pushed, pulled, or otherwise improperly moved
- If an earthquake occurs and the TV is not properly secured.

To install the stands:

Remove any plastic wrapping from the TV and the stands.
Place the TV screen-down on a clean, flat surface. To prevent scratches or damage to the screen, place the TV on a soft surface such as a blanket and avoid any sharp edges.
Insert the left and right stands into the base of the TV. (The stands are identical.)

Secure each stand to the TV with two Phillips screws (included). Insert the screws into the back of the TV and tighten them using a Phillips screwdriver.

When you are finished, place the TV on a stable, level surface.
Installing the TV on a Wall

To mount your TV on a wall, you will need a wall mount. Consult the information below to find the appropriate mount for your TV model:

Be sure the mount you choose is capable of supporting the weight of the TV. After you have determined that you have the correct mount for your TV, you can begin the installation.

To install your TV on a wall:

1. Disconnect any cables connected to your TV.
2. Place the TV face-down on a clean, flat, stable surface. Be sure the surface is clear of debris that can scratch or damage the TV.
3. Remove the base by loosening and removing the screws.
4. Attach your TV and wall mount to the wall, carefully following the instructions that came with your mount. Use only with a UL-listed wall mount bracket rated for the weight/load of this TV.

Without HDMI ARC

Without an HDMI ARC setup, your TV needs an extra cable to connect it to your home audio receiver. The audio signal is analog-only.

With HDMI ARC

HDMI ARC transmits all-digital audio from your TV to your home audio receiver, with no need for an extra cable. The single HDMI cable also carries digital HD (high definition) video to your TV.
CONNECTING TO YOUR NETWORK

Your TV is Internet-ready. It can be connected to your home network with a Wired or Wireless connection.

Connecting to a Wired Network (Best)
1. Connect an Ethernet cable to your router and to the Ethernet port on the back of the TV. See below.

2. Use the Guided Network Setup to configure the TV. See Using the Guided Setup Menu on page 58.

Connecting to a Wireless Network
1. Ensure you have a router or modem broadcasting as high-speed wireless signal (802.11n recommended).

2. Use the Guided Network Setup to configure the TV. See Using the Guided Setup Menu on page 58.
Completing the First-Time Setup

The first time you turn on the TV, the Setup App will guide you through each of the steps necessary to get your TV ready for use.

Before you begin the first-time setup:
- Your TV should be installed and the power cord should be connected to an electrical outlet.
- Your devices should be connected.
- If you have a wireless network, have the wireless password ready.
- If you are connecting to your network with an Ethernet cable, connect it to the Ethernet port on the TV.

To complete the first-time setup:
1. Press the **Power** button on the remote. The TV powers on and the Setup App starts.

2. Use the **Arrow** buttons on the remote to highlight **Home Use** and press **OK**.

3. Use the **Arrow** buttons on the remote to highlight your preferred language, and then press the **OK** button.

4. Use the **Arrow** buttons on the remote to highlight your country, and then press the **OK** button. Use the **Arrow** buttons on the remote to highlight your timezone, and then press the **OK** button.

5. Use the **Arrow** buttons on the remote to highlight your wireless network in the list of available networks and press **OK**.

   Type the wireless password using the on-screen keyboard, then highlight **Connect** and press **OK**.

6. Use the **Arrow** and **OK** buttons on the remote to read and accept the Terms and Conditions and the Privacy Policy. When you are finished, highlight **I Accept** and press **OK**.

7. Type your E-mail Address, First Name, Last Name, and ZIP Code using the on-screen keyboard.

   Highlight **Next** and press **OK**.
8. Use the Arrow buttons on the remote to highlight your TV source and press OK.

If you have cable TV, select whether you have a cable box or if you connect the TV directly to a cable from the wall.

9. If the TV Signal screen appears, the TV will need to scan for channels, which takes several minutes. Use the Arrow buttons on the remote to highlight Begin Scan and press OK.

10. Use the Arrow and OK buttons on the remote to select the input your TV source is connected to.

The First-Time Setup is complete.
Using the On-Screen Menu

Your TV features an easy-to-use on-screen menu.

To open the on-screen menu, press the MENU button on the remote.

From this menu, you can:
- Adjust the Picture settings
- Adjust the Audio settings
- Activate the Sleep Timer
- Adjust the Network settings
- Adjust the Channels
- Set up Closed Captioning
- Name the TV Inputs
- Adjust the TV Settings
- Access the Guided Setup
- Access the User Manual

NAVIGATING THE ON-SCREEN MENU

To open the on-screen menu, press the MENU button on the remote.

Use the Arrow buttons to highlight a menu option, and press the OK button to select that option.

CHANGING THE INPUT SOURCE

External devices such as DVD players, Blu-ray Players, and video game consoles can be connected to your TV. To use one of these devices with your TV, you must first change the input source in the on-screen menu.

To change the input device:

1. Press the INPUT button on the remote. The input menu is displayed.

2. Use the Up/Down Arrow buttons or the INPUT button on the remote to highlight the input you wish to view and press OK. The selected input is displayed.

You can change the input names that appear on the Input menu to make your devices easy to recognize. See Renaming Inputs (Using the Devices Menu) on page 49 for more information.

Note: Inputs may vary by TV.
CHANGING THE SCREEN ASPECT RATIO

The TV can display images in five different modes: Normal, Stretch, Panoramic, Wide, and Zoom. Each mode displays the picture differently.

To change the screen aspect ratio:

1. Press the WIDE button on the remote.
2. Use the Arrow buttons to highlight the aspect ratio you wish to view and press OK.
   - **Normal** preserves the content’s original aspect ratio. Since the 4:3 aspect ratio is not large enough to fill the TV’s screen, black bars are added to the left and right of the display image.
   - **Stretch** expands the display image to fill the screen. Images may appear wider than intended. If you are watching widescreen (1.85:1 or 2.35:1) content, black bars will still appear on the top and bottom of the display image. **This option is only available when the TV is displaying a 720p/1080i/1080p source.**
   - **Panoramic** expands the display image to fill the width of the screen. Images may appear wider than intended. When this is the case, you can use the TV’s Rating Block feature to block content based on its rating.

   - **Stretch** expands the display image to fill the screen. Images may appear wider than intended. If you are watching widescreen (1.85:1 or 2.35:1) content, black bars will still appear on the top and bottom of the display image. **This option is only available when the TV is displaying a 720p/1080i/1080p source.**

3. Transfer. You may not rent, lease, lend, redistribute or sublicense the VIZIO Software or access to the VIA Services. You may, however, make a one-time permanent transfer of all of your license rights to the VIZIO Software to another party, provided that: (a) the transfer must include the VIZIO HD TV, including all its component parts, original media, printed materials and this License Agreement; (b) you do not retain any copies of the VIZIO Software, full or partial, including copies stored on a computer or other storage device; and (c) the party receiving the VIZIO HD TV and VIZIO Software reads and agrees to accept the terms and conditions of this License Agreement.

the use of or access to certain VIA Services, in any case and without notice
or liability. VIZIO makes no warranties or representations that any particular
VIA Service will be accessible, available, function in any particular manner or
