To prevent your TV from being damaged, the following instructions should be observed for the installation, use, and maintenance of your TV. Read the following safety instructions before operating your TV. Keep these instructions in a safe place for future reference.

- To reduce the risk of electric shock or component damage, switch off the power before connecting other components to your TV.
- Read these instructions.
- Keep these instructions.
- Heed all warnings.

- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the prong of a plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as when the power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- Unplug the power cord before cleaning your TV.
- When moving your TV from an area of low temperature to an area of high temperature, condensation may form in the housing. Wait before turning on your TV to avoid causing fire, electric shock, or component damage.
- A distance of at least three feet should be maintained between your TV and any heat source, such as a radiator, heater, oven, amplifier etc. Do not install your TV close to smoke. Operating your TV close to smoke or moisture may cause fire or electric shock.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of your TV and to protect it from overheating, be sure these openings are not blocked or covered. Do not place your TV in a bookcase or cabinet unless proper ventilation is provided.
- Never push any object into the slots and openings on your TV cabinet. Do not place any objects on the top of your TV. Doing so could short circuit parts causing a fire or electric shock. Never spill liquids on your TV.
- Your TV should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
• Do not apply pressure or throw objects at your TV. This may compromise the integrity of the display. The manufacturer’s warranty does not cover user abuse or improper installations.

• The power cord must be replaced when using different voltage than the voltage specified. For more information, contact your dealer.

• When connected to a power outlet, power is always flowing into your TV. To totally disconnect power, unplug the power cord.

• The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of un-isolated, dangerous voltage within the inside of your TV that may be of sufficient magnitude to constitute a risk of electric shock to persons.

• Do not overload power strips and extension cords. Overloading can result in fire or electric shock.

• The wall socket should be installed near your TV and easily accessible.

• Only power of the marked voltage can be used for your TV.

• Do not touch the power cord during lightning. To avoid electric shock, avoid handling the power cord during electrical storms.

• Unplug your TV during a lightning storm or when it will not be used for long period of time. This will protect your TV from damage due to power surges.

• Do not attempt to repair or service your TV yourself. High voltages, electric shock, and other hazards. If repair is required, contact your dealer and refer all servicing to qualified service personnel.

• WARNING: Keep your TV away from moisture. Do not expose your TV to rain or moisture. If water penetrates into your TV, unplug the power cord and contact your dealer. Continuous use in this case may result in fire or electric shock.

• Do not use your TV if any abnormality occurs. If any smoke or odor becomes apparent, unplug the power cord and contact your dealer immediately. Do not try to repair your TV yourself.

• Avoid using dropped or damaged appliances. If your TV is dropped and the housing is damaged, the internal components may function abnormally. Unplug the power cord immediately and contact your dealer for repair.

• continued use of your TV may cause fire or electric shock.

• Do not install your TV in an area with heavy dust or high humidity. Operating your TV in environments with heavy dust or high humidity may cause fire or electric shock.

TELEVISION ANTENNA CONNECTION PROTECTION

If an outside antenna/satellite dish or cable system is to be connected to the TV, make sure that the antenna or cable system is electrically grounded to provide some protection against voltage surges and static charges.

Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of the grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements of the grounding electrode.

Lightning Protection

For added protection of the TV during a lightning storm or when it is left unattended or unused for long periods of time, unplug the TV from the wall outlet and disconnect the antenna or cable system.

Power Lines

Do not locate the antenna near overhead light or power circuits, or where it could fall into such power lines or circuits. Remember, the screen of the coaxial cable is intended to be connected to earth in the building installation.

INSPECTING THE PACKAGE CONTENTS
Before installing your new TV, take a moment to inspect the package contents. Use the images below to ensure nothing is missing or damaged.

VIZIO LED UHD TV with Stand
Power Cord
Two-Sided Remote with Keyboard (Batteries Included)
TV Stands
2 x Quick Start Guides (1 English, 1 French-Spanish)
4 x Phillips Screws

PACKAGE CONTENTS
INSTALLING THE TV

After removing the TV from the box and inspecting the package contents you can begin installing the TV. Your TV can be installed in two ways:

- On a flat surface, using the included stand
- On a wall, using a VESA-standard wall mount (not included)

Installing the TV Stand

Your TV includes a stand designed to support the weight of the TV and keep it from falling over. However, the TV can still fall over if:

- It is placed on an uneven, unstable, or non-level surface
- It is pushed, pulled, or otherwise improperly moved
- If an earthquake occurs and the TV is not properly secured

It is recommended that two people take part in the base installation.

Place the TV screen-down on a clean, flat surface. To prevent scratches or damage to the screen, place the TV on a soft surface, such as carpet, rug, or blanket.

To install the stands:

1. Insert the stands into the base of the TV.
2. Secure each stand to the TV with two (2) Phillips screws (included). Insert the screws into the back of the TV and tighten them using a Phillips screwdriver.
3. When you are finished, place the TV on a stable, level surface.
Installing the TV on a Wall

To mount your TV on a wall, you will need a wall mount. Consult the information below to find the appropriate mount for your TV model:

- Installing a TV on a wall requires lifting. To prevent injury or damage to the TV, ask someone to help you.

</table>

Be sure the mount you choose is capable of supporting the weight of the TV. After you have determined that you have the correct mount for your TV, you can begin the installation.

To install your TV on a wall:

1. Disconnect any cables connected to your TV.
2. Place the TV face-down on a clean, flat, stable surface. Be sure the surface is clear of debris that can scratch or damage the TV.
3. Remove the stands by loosening and removing the screws.
4. Attach your TV and wall mount to the wall, carefully following the instructions that came with your mount. Use only with a UL-listed wall mount bracket rated for the weight/load of this TV.

- For some wall mounts, you may want to use cables with right-angle connectors. This allows the TV to rest closer to the wall.
REMOTE SENSOR & POWER INDICATOR

When using the remote, aim it directly at this sensor.

The power indicator flashes on when the TV turns on, then goes out after several seconds.

To keep the power indicator on as long as the TV is on, see “Turning the Power Indicator On or Off” on page 46.

CONNECTING TO YOUR NETWORK

Your TV is Internet-ready. It can be connected to your home network with a Wired or Wireless connection.

Connecting to a Wired Network (Best)
1. Connect an Ethernet cable to your router and to the Ethernet port on the back of the TV. See below.
2. Use the Guided Network Setup to configure the TV. See Using Guided Setup on page 48.

Connecting to a Wireless Network
1. Ensure you have a router or modem broadcasting as high-speed wireless signal (802.11n recommended).
2. Use the Guided Network Setup to configure the TV. See Using Guided Setup on page 48.
The first time you turn on the TV, the Setup App will guide you through each of the steps necessary to get your TV ready for use.

Before you begin the first-time setup:
- Your TV should be installed and the power cord should be connected to an electrical outlet.
- Your devices should be connected.
- If you have a wireless network, have the network password ready.
- If you are connecting to your network with an Ethernet cable, connect it to the Ethernet port on the TV.

To complete the first-time setup:

1. Press the Power button on the remote. The TV powers on and the Setup App starts.

2. Use the Arrow buttons on the remote to highlight Home Use and press OK.

3. Use the Arrow buttons on the remote to highlight your language of preference and press OK.

4. Use the Arrow buttons on the remote to highlight your country, and then press OK.
Select your time zone and press **OK**.

Select the name of your wireless network from the list of available networks and press **OK**.

Enter the network password using the keyboard on the remote, then highlight **Connect** and press **OK**.

Use the **Arrow** and **OK** buttons on the remote to review the Terms Of Service and Privacy Policy. When you are finished, highlight **I Accept** and press **OK**.

Enter your **E-mail Address**, **First Name**, **Last Name**, and **Zip Code** using the keyboard on the remote. Highlight **Next** and press **OK**.

While navigating the on-screen menu, you can press the **BACK** button at any time to return to the previous menu screen. The **EXIT** button will close the on-screen menu.

### Changing the Input Source

External devices such as DVD players, Blu-ray Players, and video game consoles can be connected to your TV. To use one of these devices with your TV, you must first change the input source using the Input menu.

To change the input source:

1. Press the **INPUT** button on the remote. The Input menu is displayed.
2. Use the Up/Down **Arrow** buttons or the **INPUT** button on the remote to highlight the input you wish to view and press **OK**. The selected input is displayed.

You can change the input names that appear on the Input menu to make your devices easy to recognize. See Renaming Devices on the Input Menu on page 41 for more information.
CHANGING THE SCREEN ASPECT RATIO

The TV can display images in five different modes: Normal, Stretch, Panoramic, Wide, and Zoom. Each mode displays the picture differently. See Adjusting the Wide Mode (Aspect Ratio) on page 45 for an alternate way of adjusting the screen aspect ratio.

To change the screen aspect ratio:

1. Press the button on the remote.
2. Use the Arrow buttons to highlight the aspect ratio you wish to view and press OK.

- Normal preserves the content’s original aspect ratio. Since the 4:3 aspect ratio is not large enough to fill the TV’s screen, black bars are added to the left and right of the display image.
- Stretch expands the display image to fill the screen. Images may appear wider than intended. If you are watching widescreen (1.85:1 or 2.35:1) content, black bars will still appear on the top and bottom of the display image. This option is only available when the TV is displaying a 720p/1080i/1080p source.
- Panoramic expands the display image to fill the screen. Images may appear wider than intended. If you are watching widescreen (1.85:1 or 2.35:1) content, black bars will still appear on the top and bottom of the display image. This option is only available when the TV is displaying a 480i/480p source.
- Wide stretches a 4:3 aspect ratio picture to the edges of the screen. Since the picture is being stretched, the display image may appear distorted. If the program is already formatted for widescreen viewing (1.85:1 or 2.35:1), then black bars will appear on the top and bottom of the display image.
- Zoom expands images with black bars to fit the screen.

VIEWING VIDEO WITH THE MENU OPEN

When the on-screen menu opens, it covers the left-hand portion of the picture. The picture can be displayed in three different ways:

- Full-sized and centered on the screen (Overlay) - The left-hand portion of the picture covered by the menu.
- Resized to fit (Viewport) - The entire picture is visible in the space to the right of the menu.
- Full-sized and aligned to the right edge of the menu (Centered Overlay) - The picture extends off of the right side of the screen.

To change the position of the picture while the on-screen menu is displayed:

1. Use the Arrow buttons on the remote to highlight .
2. Press OK to cycle through the three display methods.
3. Press the Up Arrow button on the remote to the menu.
4. See Changing the View Mode Settings on page 45 for an alternate method of adjusting the video.
ADJUSTING THE PICTURE SETTINGS

Your TV display can be adjusted to suit your preferences and viewing conditions.

Changes made while on any preset picture mode will add an asterisk on the top right corner of the preset mode (see Saving a Custom Picture Mode on page 27).

To adjust the picture settings:

1. Press the MENU button on the remote. The on-screen menu is displayed.
2. Use the Arrow buttons on the remote to highlight Picture and press OK. The PICTURE menu is displayed.
3. Use the Arrow buttons on the remote to highlight Picture Mode, then use the Left/Right Arrow buttons to change the picture mode:
   - Standard mode sets the picture settings to the default settings.
   - Calibrated mode sets the picture settings to values ideal for watching TV in a brightly-lit room.
   - Calibrated Dark mode sets the picture settings to values ideal for watching TV in a dark room.
   - Vivid mode sets the picture settings to values that produce a brighter, more vivid picture.
   - Game mode reduces throughput delays and optimizes the picture settings for displaying game console output.
   - Computer mode optimizes the picture settings for displaying computer output.
4. To manually change each of the picture settings, use the Up/Down Arrow buttons on the remote to highlight that picture setting, then use the Left/Right Arrow buttons to adjust the setting:

A channel may sometimes broadcast programs that are meant for children, and at other times broadcast programs that are meant for mature audiences. You may not want to block the channel completely using a channel lock, but you may wish to block certain programs from being viewed.

For a list of content ratings and their definitions, visit www.tvratings.org.

To block or unblock content by its rating:
