

## **Before You Begin**

- Verify all of the contents of your accessory package
- Review safety guidelines in Owner's Manual
- Place your High Definition TV so that the rear connectors are accessible
- Install AA batteries into the VIZIO Remote Control
- Write down your V022L 10A Serial Number (located on the back)

### **Contents:**

Power Cord

Remote Control Includes 2 AA Batteries

Screen Cloth & HDMI Cable

### **The Best Connection**

For the best quality picture, we recommend using HDMI, DTV, RGB or Component inputs when possible. These are the only inputs capable of high definition (HD). Using these inputs does not guarantee high definition unless a high definition source is connected. However, not all equipment is capable of these connections. TV, AV and S-Video are not capable of HD signals.

+ Both DTV and TV share the same port. The television will automatically register which input type is connected.

VIZIO provides installation services, cables & wall mounts (see details for Optional Components on back). Visit www.VIZIO.com or call 1-888-849-4623 to order today.

## Four Easy Steps Simply follow our color-coded Step Charts and you're done.

### 1) Choose items to connect to your VIZIO HDTV 2) Choose equipment

- Determine which type of Signal Source and any Additional Equipment you wish to connect to your VIZIO HDTV.
- The colored dots under each Signal Source and Additional Equipment indicate which type of connections you may use to connect to your VIZIO HDTV.

### **3 WAYS TO GET HDTV**

- 1) Off-Air antenna (using the DTV antenna input). To see if you are able to receive HD signals off-air and for help choosing the right antenna, visit www.antennaweb.org.
- 2) Cable Subscribe to HD programming through your local cable company (HD cable box required).
- 3) Satellite Subscribe to HD programming through Direct TV or Dish Network (HD satellite receiver required).

## connection methods

- Using the colored dots from Step One, follow the row across to Step Two to match up the colored dots to the same colored connection method.
- Choose ONLY one method for each piece of equipment.

### 3) Select cables and make connections

- Once you have determined the connection methods from Step Two, follow the row to Step Three to determine what kind of cables you need and what the connections look like on your equipment.
- Following the color-coded system, use the appropriate cables and connect your Signal Source and Additional Equipment to the color-coded
- Once connected, turn on your VIZIO HDTV and all your equipment.

inputs on your VIZIO HDTV. (Refer to **Connection Map** at bottom of page.)

### 4) Use your VIZIO HDTV

Follow the programming instructions on the other side of this guide.

- If you are using the DTV/TV input, turn over this guide and follow Procedure 1.
- If you are using an input other than DTV/TV, turn over this guide and follow Procedure 2.

complete. Press the 🕎 key to exit.	

**©** Composite connection (RCA connectors) is recognized by the three (yellow, red and white) standardized color coded RCA connectors. Yellow carries the image (picture); red (right channel) and white (left channel) carry the sound (audio) of the signal.

**©** Component connection (RCA connectors) is recognized by the three (green, blue and red) standardized color coded RCA connectors for image (picture) plus the two (red and white) standardized color coded RCA connectors for the sound (audio) of the signal.

• HDMI (High-Definition Multimedia Interface) connection (HDMI connector) is recognized by the standardized elongated D-Shaped connector which carries both the image (picture) and the sound (audio) of the signal through a single cable.

**G** S-Video (separate video) connection (4-pin Mini-DIN connector) is recognized by the small connectors at the end of a cable with multiple pins in it. This connection carries only the image (picture) of the signal; therefore, there is a need to supply a separate sound (audio) signal by using the two (red and white) standardized color coded RCA connectors.
